

WINDOW SAFETY TIPS

Keep children safe with these tips to prevent accidental falls from a window.

*8 children under 5 die and another 3,300 children are hospitalized every year due to injuries from window falls.**

DO

DON'T

1

When young children are around, keep windows closed and locked.

2

When opening a window for ventilation, use those located out of a child's reach.

3

Supervise children to keep child's play away from windows, balconies, and patio doors.

7

Install ASTM F2090 compliant devices designed to limit how far a window will open to help prevent a fall.

Prevent opening more than 4"

4

Don't place furniture near windows to prevent young children from climbing and gaining access to an open window.

5

Don't allow children to jump on beds or other furniture to help reduce potential falls.

6

Don't rely on insect screens to prevent a window fall. Insect screens are designed to keep bugs out, not keep children in the home.
